What is SpainAtMid?

SpainAtMid is a new non-displayed order book that facilitates the execution of Spanish equities at the midpoint of BME's lit order book. Additionally, the Sweep functionality can be used to allow unmatched orders to be entered into the lit book with no added latency.

How Does SpainAtMid Work?

SpainAtMid is available only during continuous market conditions. To access BME's non-displayed order book there are two options:

- **Direct order** – supports limit and market orders with day, Good Till Date validity or IOC validities
- **Sweep order** – supports market and limit orders with day, Good Till Date and IOC (enabled in lit) validities

Direct Order to SpainAtMid

- All executions are guaranteed to be at the midpoint of the lit order book of BME
- Supports limit and market orders with day, IOC or Good Till Date validity
- Minimum Quantity is available to allow members to ensure minimum sizes for fills

Sweep Functionality in SpainAtMid

Sweep orders are initially introduced into the SpainAtMid book and will match any available liquidity; the remaining volume that is not executed will switch to the lit book in a single matching cycle without additional latency.

If the Sweep order comes from a retail investor, it will first check if the Retail Liquidity Provider of the lit book is offering a better price than the midpoint, in which case it will trade against the RLP before switching to SpainAtMid.

Sweep orders support market and limit orders with day, Good Till Date and IOC (enabled in lit) validities.

SpainAtMid is available only during continuous market conditions. Sweep orders introduced during auctions and TAL will bypass the non displayed order book and will be sent directly to the lit order book.
